Product Development Lifecycle

Prerequisite

A customer has a clear vision of his product and is looking for a team of product development experts who can define the scope, test the assumptions, and develop the product quickly in iterations.

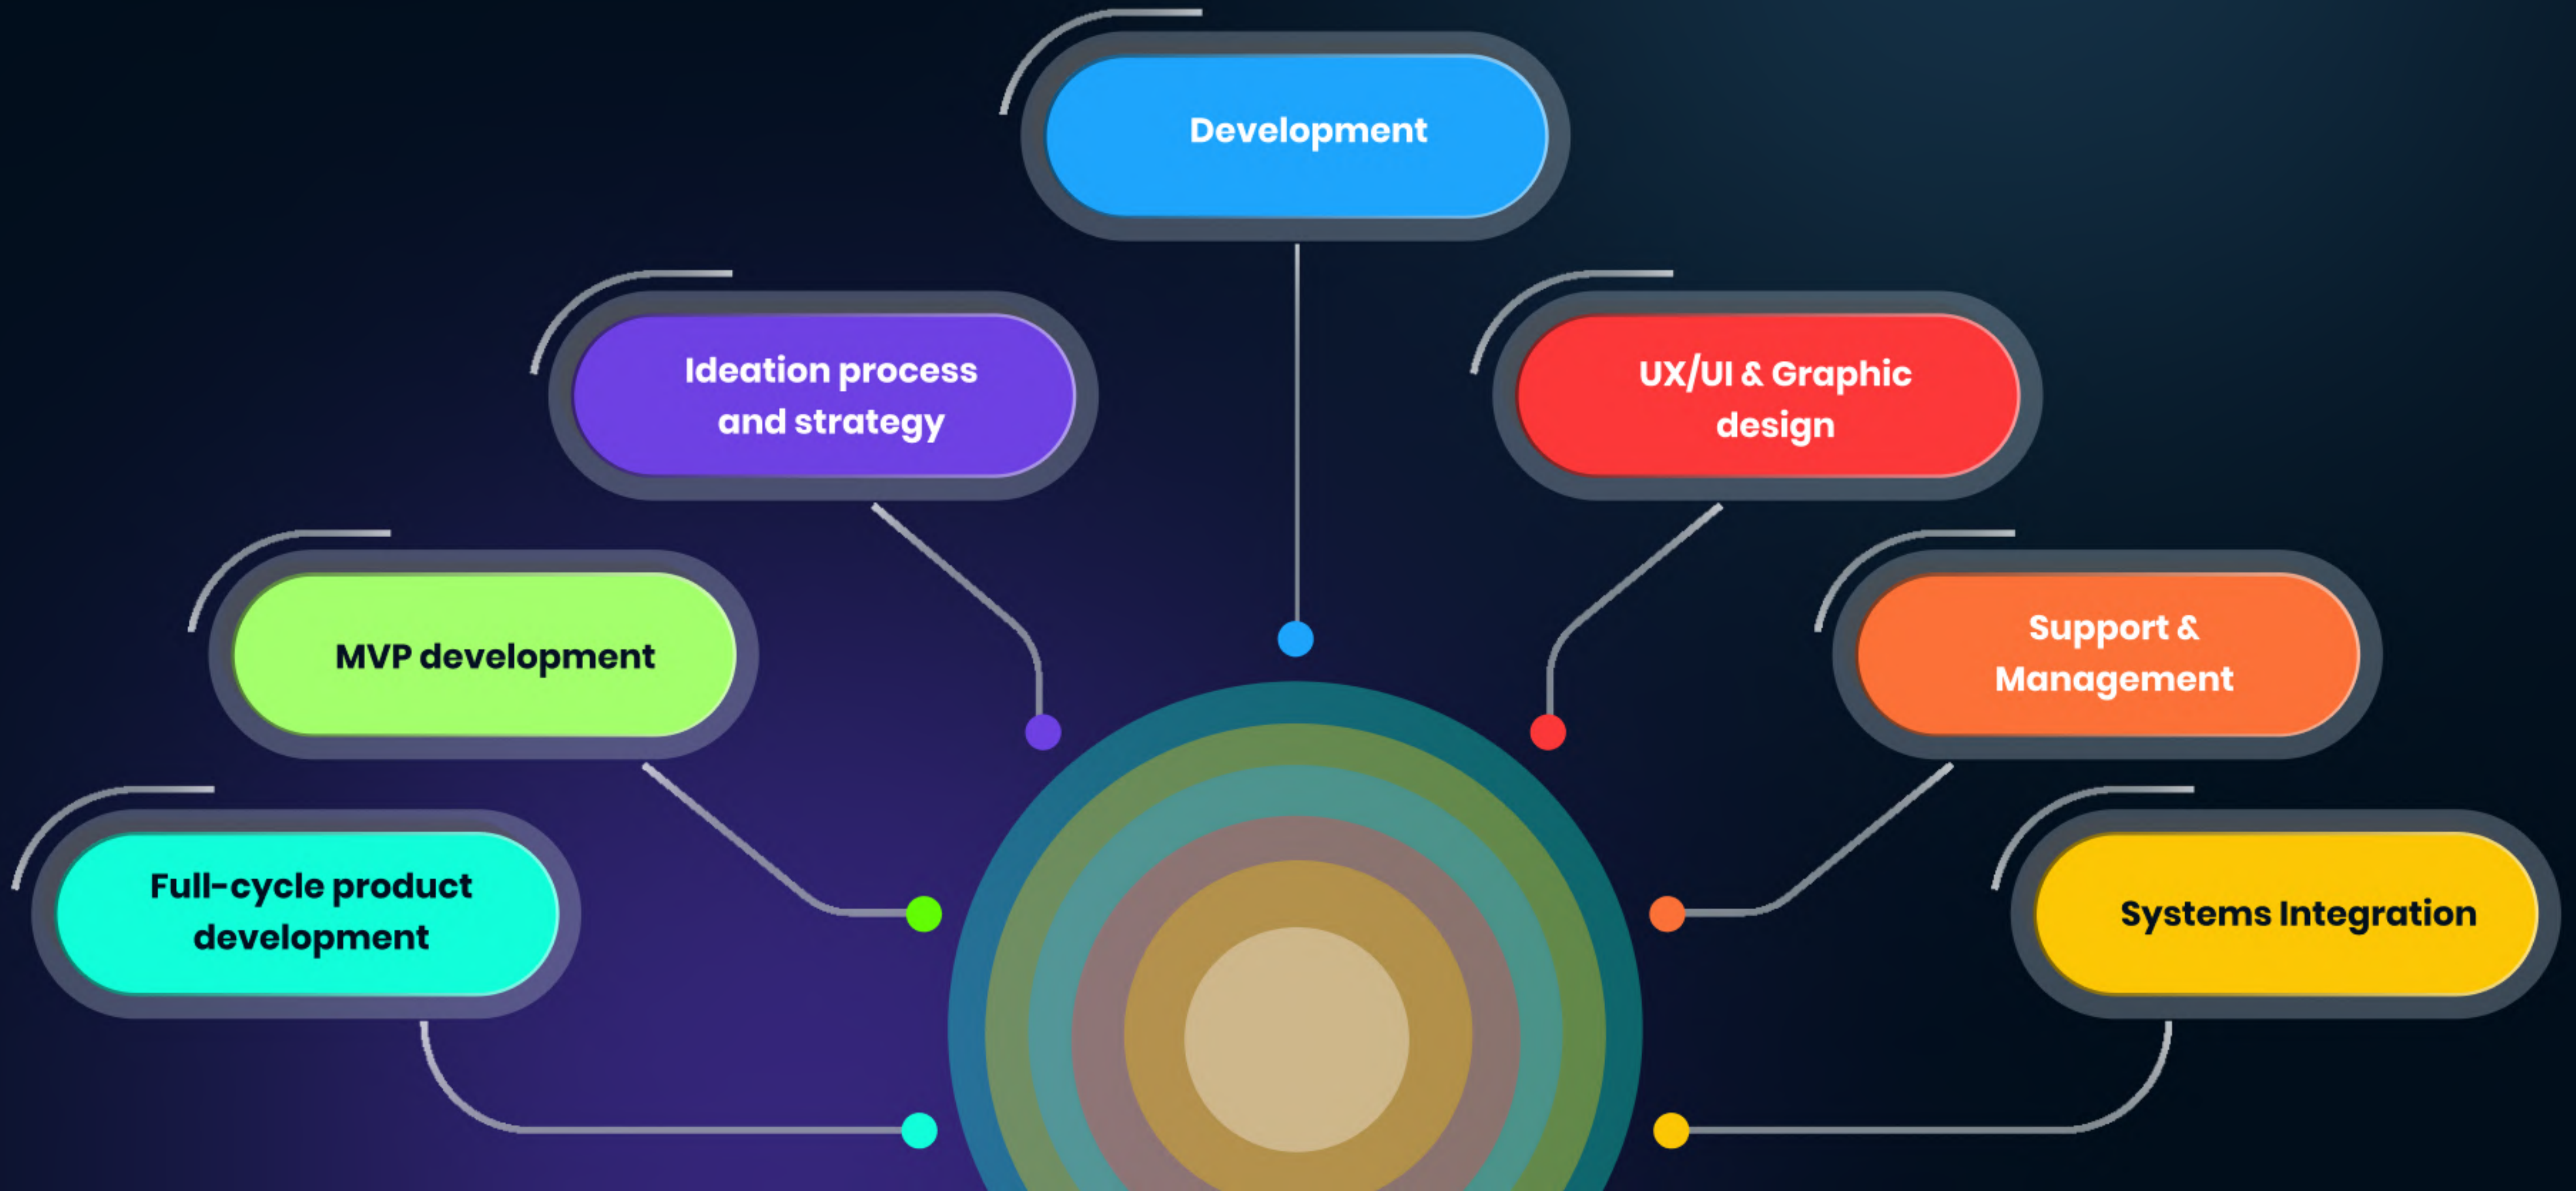

Problem

Customer is not familiar with agile development and does not have the knowledge to develop a scalable working product.

Solution

JSguru's product dev teams collaborate with the customer through ideation, setting up the architecture, crafting design, developing, and testing the product.

Our Services

Methodology and Standardization

ISO 27 001: 2013

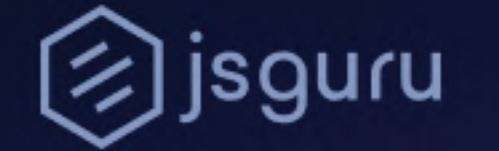

Agile Methodologies & Frameworks

Standardize selection, planning, delivery, and support of IT services

- Increasing Efficiency
- Achievement of the planned level of services
- Tested and Secured Product Source Code

Testimonials

Andrea Brighenti

CEO LetInvite

"JSGuru has finished the platform within two months. They have used a simple workflow with a dashboard that has made their work easily traceable. The vendor has also shown flexibility in fulfilling challenging requests while still respecting their deadlines."

Patrick Lawson

CEO of Mobile Guardian

"JSGuru has been efficient and proactive. One of the group's key differentiators is how self-managing they are. They can take ownership not only of the code, but also of the time frame."

Igor Jocić

CEO Folkalist

"Their people are great listeners and show respect and sensitivity to ideas and vision."

Nikola Maksimčuk

Co-Founder of City Gecko

"We collaborated previously with JSGuru and this time again we knew they'd give us exactly what we needed. At JSGuru they always looked at us not as a client, but as a partner."

James Isilay

Cognism CEO

"We're impressed by their flexibility and domain knowledge for our industry."

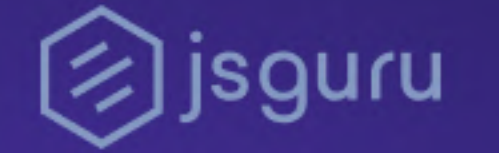

Chris Lee

CEO Cloud Age Solutions

"We built a good relationship and it would be difficult to proceed without them."
